As part of National Science Week 2014, the Australian National University (ANU) is holding a series of informal, science-based conversations with rural and regional communities around the country on aspects of climate adaptation relevant to community concerns and interests.

Participants will hear from:

*Dr Malcolm Gill - Climate and fire*

Malcom's expertise covers topics such as fire management, fire ecology, fire behaviour, fire weather and the effects of fire regimes, generally.

*Dr Sara Beavis - Climate and water*

Some of Sara's research interests are hydrogeology, land capability and soil degradation, and environmental science and management.

*Mr Clem Davis - Climate and weather*

Clem worked for the Bureau of Meteorology for 33 years and was Officer in Charge at the Canberra Meteorological Office for 9 years.

Presented by

ANU College of  
Medicine, Biology  
& Environment  
Physical &  
Mathematical Sciences

This conversation is free and open to the public.
